A737 Roadhead Roundabout

Contract Value	£1,300,000
Contract Period	7 months
Contract Form	ICE 5 th Edition
Client	Transport Scotland
Engineer	Amey Infrastructure

Land Engineering was contracted for major works at the A737/A738 St James Interchange, Kilwinning to Hawkhill Trunk Road, at its junction with the A760. This involved the construction of a new roundabout and carriageway, earthworks and surface overlay of existing pavements with associated road and SuDS drainage, kerbing, footway and cycle path, public utilities works, accommodation works, street lighting, road markings, traffic signs and associated traffic management.

Activities

- Site clearance
- Fencing
- Drainage
- Earthworks
- Pavement construction
- Kerbing and paved areas
- Signing and road markings
- Street lighting
- Traffic signals
- Utility diversions
- Landscaping works

Outcome

This complex project was completed as planned, paying careful attention to minimising traffic disruption and inconvenience to road users.
