

## **Castle Business Park**

**Contract Period** 1995 - present

**Architect** Ian White Associates

For well over a decade, we have been contracted to deliver high quality maintenance services at Castle Business Park. This prestigious site is located below Stirling Castle, close to the M90 motorway.

### **Activities**

- Our work involves maintaining all aspects of the landscape, including grass cutting, planted areas, beech hedging, woodland areas, hard surfaces, lake, fountain and fencing.
- During the winter months, we pay particular attention to snow clearance and de-icing, staying informed about approaching weather events via Met Office reports.

### **Outcome**

As is the norm with Land Engineering maintenance contracts, the site is meticulously maintained to a high standard.
