Historic Scotland - Grounds Maintenance

Client Historic Scotland

Land Engineering is carrying out grounds maintenance at multiple locations of historic interest within the four Scottish regions awarded to our company.

Activities

- Mowing of all lawns, semi-coarse grasslands, slopes, ramparts.
- Trimming of all lawn edges.
- Strimming around the bases of walls, trees and signs.
- The application of approved herbicides as and when specified.
- Weed control of all footpaths, car park, road gutters and gravel areas.
- Gardening duties on landscaped areas, including weeding, forking, pruning and applying fertilisers.
- Leaf and branch clearing.
- Maintenance of hedges and shrub beds.

Outcome

Many prestigious sites are now being maintained to a high specification and exacting standards.
